

UdaPeople CI/CD Adoption

What does the Business team want ?

Customer Satisfaction

Increase Revenue

Frequent bug-free releases

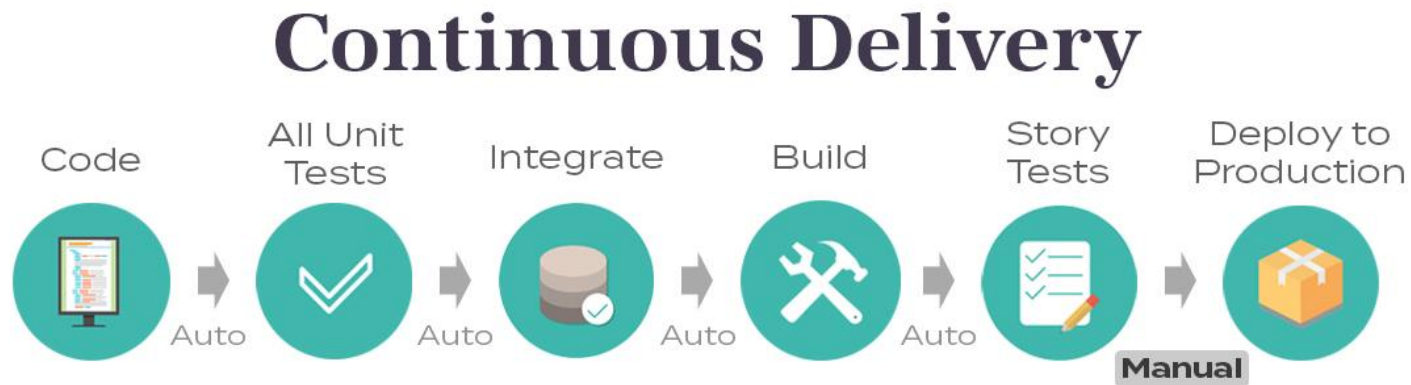

Why do we fail at that ?

- misunderstanding between Dev team and stalk-holders
- delayed releases due to integration and testing problems
- poor monitoring resulted in passive attitude when dealing with incidents

How CI/CD can address that ?

By adopting CI/CD we can achieve:

- 1) Minimizes Integration Time
- 2) Enables Automated Testing
- 3) Less time spent creating and deploying builds
- 4) Better communication between the teams

What are the Benefits of Adopting CI/CD

Increased Customer Satisfaction

Maximizing Revenue

Provide frequent releases

Proactive mindset in Monitoring and Alerts
